COMPLETE

A full range of machines for the production and for all kind of transformation of flexible expanded films. For small, medium and large productions.

EXPERIENCED

Thirty years' experience in building machines for processing flexible expanded films.

Thirty-years experience in supplying machinery to the flexible expanded films industry. A complete array of machines: FAP makes all the machinery for making and processing flexible expanded films on a small, medium, and large productions. Turn key factories and know how for making and further processing flexible expanded films. Tailor made engineering of simple, reliable and innovative systems.

The World Is Our Market

FAP was established in the 'Eighties in the Brianza industrial district of Northern Italy - a monument to Lombard entrepreneurship. Luigi Poli, founder and present day Chairman, led FAP all the way from the production of simple machinery for making packaging materials to today's fully engineered, fully equipped production lines and turnkey factories. Tailoring the plants to every customer's specific requirements is FAP's trump card on the domestic and overseas markets. FAP's competitive edge lies in the quality of its technical support, its timely and effective assistance, its ability to help the customer to make the best choices.
